ROSA® Hip is a personalized robotic system that enables direct anterior surgeons to evaluate and execute a surgical plan based on real-time feedback and the patient’s unique anatomy. It provides surgeons with reassurance and control, while seamlessly integrating into their workflow.

Combining ZBEdge™ Dynamic Intelligence™ integrated technologies with the clinical heritage of our comprehensive implant systems, Zimmer Biomet is revolutionizing the standard of care.
HIP DISLOCATION IS ONE OF THE LEADING CAUSES OF REVISION\textsuperscript{3-5} AND CAN INCREASE HOSPITAL COSTS BY UP TO 300\% FOLLOWING PRIMARY TOTAL HIP ARTHROPLASTY.\textsuperscript{6,7}

TECHNOLOGIES THAT AID IN COMPONENT IMPLANTATION WILL REDUCE OUTLYING POSITIONS, WHICH MAY REDUCE RISK OF DISLOCATION.\textsuperscript{8}
SURGEON-CENTERED

ROSA Hip is customized to a surgeon’s existing direct anterior workflow to maintain surgical efficiency.

FLUOROSCOPY-BASED WORKFLOW

FLAT PANEL DETECTOR AND IMAGE
INTENSIFIER COMPATIBILITY
Compatible with **Avenir Complete® Hip System** and **G7® Acetabular System**

From implants to instruments, surgical systems to support services, each product of the Zimmer Biomet portfolio has been designed to address the distinct needs of individual patients.

The Avenir Complete® Hip System, together with the G7® Acetabular System, pairs a comprehensive offering of stems, shells and liners (including Dual Mobility) with streamlined instrumentation designed to meet distinct patient needs, simplify the surgical workflow and maximize hospital and OR efficiencies.

*ROSA Hip is also compatible with Taperloc® Complete Hip System, Avenir® Hip System, and Echo Bi-Metric® Stem*
ACCURATE

Precisely assists with accurate acetabular component orientation and leg length through robotic guidance.¹

- Component positioning with ROSA Hip has been shown to be more accurate and reproducible than conventional instrumentation.¹

- Provides real-time data to evaluate leg length and offset decision-making intra-operatively.
  - Designed to measure leg length change from Lesser or Greater Trochanter.

- ROSA Hip resulted in 100% of cases within the Lewinnek and Callanan Safe Zones (fewer outliers compared to conventional instrumentation).¹

- Use ONE Planner™ Hip, our web-based surgical software, to plan a hip replacement case.
  - Utilizes pre-operative X-ray images to validate implant components and neck cut location, restore leg length and offset and evaluate pelvic tilt.
  - When utilizing ONE Planner Hip, surgeon pre-operative plans will be directly available on the ROSA Hip user interface.
EFFICIENT

Simplified setup may minimize additional time to procedure.

- **Auto landmarking and overlay tool supports a streamlined procedure.**
  - Manual landmarking may be tedious and time consuming. After your first two image uploads, ROSA Hip automatically identifies and places landmarks.
  - Overlay tool provides a comparison of X-ray images to quickly identify inconsistencies in patient and C-arm positioning.
  - Ensure femoral rotation is consistent among workflow images with trochanter trace feature.

- Plan case virtually with intuitive, web-based **ONE Planner Hip.**

- **ONE Matrix™ Hip, our Trial panel,** evaluates the **best possible implant combinations** for each patient in terms of leg length and offset.

- No pins or reference arrays required.
- No CT scans required.
Making the best decision when it matters requires data-driven intelligence.

ROSA Hip, a cornerstone of ZBEdge™ Dynamic Intelligence™, is an integral part of creating a comprehensive view of orthopedic care informed by data.

Meaningful Connections to Unlock Insights

ZBEdge is Dynamic Intelligence with the power to elevate and unlock the full potential of Zimmer Biomet’s cutting-edge suite of integrated digital technologies, robotics and implant solutions.

DATA PRIVACY

AT ZIMMER BIOMET, THE PATIENT IS ALWAYS THE PATIENT, AND NEVER THE PRODUCT.

We accept the responsibility that comes along with the new age of data transformation and we are committed to protecting the patient’s privacy.

Our dedicated teams of privacy professionals work to support Zimmer Biomet’s data protection obligations, data management and use.
