

# Persona IQ<sup>®</sup>

THE SMART KNEE™

 ZIMMER BIOMET  
Moving You Forward.™

**At Zimmer Biomet, innovation is in our DNA** and in 2012, we launched Persona® The Personalized Knee®. Designed with the ability to finetune the implant's placement for optimal fit and function, Persona continues to be one of the most personalized knee systems in the industry,<sup>1</sup> and now, were taking the next step in orthopedic innovation.

We are proud to introduce the world's first and only smart knee implant **Persona IQ**.

By combining the power of Persona The personalized knee with canary caturo te with CHIRP system, Persona IQ is smart, connected and simple. Persona IQ was designed to empower you with **Smart** post-operative metrics, ensure you're **Connected** with your patients through the mymobility® Care Management Platform, and **Simple** to use with automated data flow and an intuitive user interface.

## Smart

Persona IQ is a first-to-world smart knee implant that captures relevant gait metrics including functional knee range of motion (ROM), step count, and sampled average walking speed.

Through the mymobility dashboard, surgeons and care teams are provided remote access to key post-operative metrics throughout their patient's surgical journey, in order to monitor activity level between office visits during post-TKA care.

## Connected

Persona IQ provides a direct view of patient-specific data for at least 10 years, allowing surgeons to monitor their patients' patient's activity level between office visits. This way, they can stay connected during patients' total knee arthroplasty post-surgical care.

Additionally, patients may feel more connected in their recovery journey when they are able to follow their post-operative metrics — fostering higher patient interaction. Through the latest smart implant technology, patients will have knowledge that they're connected to their healthcare team, every step of the way.

## Simple

The collection and utilization of patient-specific data is easy with Persona IQ. The long-term data is automatically available, through a simple to use intuitive interface for both patients and physicians to view on the mymobility Care Management Platform.

By utilizing sensor-based technology, Persona IQ allows physicians and care teams to collect patient-specific data during the course of patient monitoring. The smart sensor collects data several times a day, analyzes it overnight, and presents it for review the following day. The long-term data collection is automatically available for surgeon and care team review.

# Persona IQ with the mymobility Care Management Platform

mymobility provides support and guidance to patients through a connected experience collecting the following metrics, all you have to do is enroll.

- Education & Engagement
- PROMs Collection Exceptions (Pain & Gait)
- Effortless Activity + Physiologic Tracking
- Pre- and Post-Operative Exercises
- Telemedicine (Virtual Video Visits) & Messaging
