

## Care Team Assignments

The mymobility® Care Management Platform helps surgeons and care teams deliver support and guidance to patients through a connected experience. The Care Team Assignments feature allows care teams to communicate internally, ask triage patient follow-ups questions or assign tasks to one another regarding specific patients and requests. This feature allows for a closed-loop approach to communication in addition to offering users the ability to enable notifications for new assignments.

- 1 View Assignment Status
- 2 View Assignment Detail
- 3 Edit/Comment on an Assignment
- 4 Close an Assignment
- 5 Add new Assignments

## Care Team Assignments

Care teams can use assignments to triage and manage patient inquiries, such as upcoming appointments, general patient questions and concerns.

This feature was designed to empower care teams with the tools needed to communicate effectively and provide timely, coordinated patient care, including:

- **Streamlined Communication** – Notify clinicians within the care team to urgent tasks
- **Task Assignment** – Assign tasks to one or multiple team members
- **Dashboard Updates** – Stay informed with filter and task counts on the dashboard
- **Priority Management** – Categorize tasks by urgency
- **Transparent Tracking** – View task status (acknowledged, in progress, resolved) to ensure follow-through
- **Cross-Platform Accessibility** – Manage assignments on both the web and mobile app

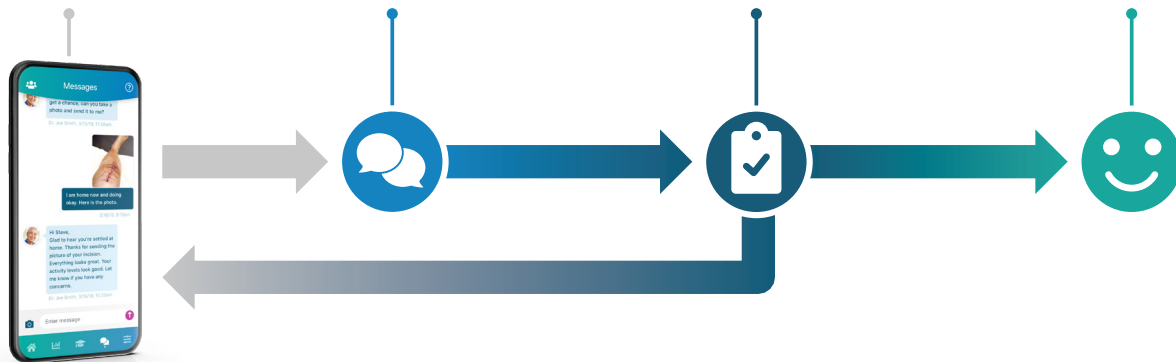

### EXAMPLE WORKFLOW

Patient sends question about incision and includes picture.

Nurse navigator reads the message and creates assignment for surgeon to review.

Surgeon reviews image during clinic hours, after finishing surgery, responds to patient, and resolves the task.

Patient happy with quick response and care team can move on to remaining assignments.

**READY TO  
GET STARTED?**
