

If you have any questions about your implanted medical device(s), including your instructions on recovery, follow-up, or activity restrictions, or you experience any unusual or increased pain, swelling, or redness around your surgery site, contact your doctor. If there is anything in this leaflet that you are not sure about, or anything you do not understand, ask your doctor

You will also receive a patient implant card that holds important information about your implant. If you need medical assistance, show your card to the attending doctor at your health facility.

### **How often will I need to visit the doctor?**

Your doctor will decide. This will depend on your individual situation, medical history, and other medical conditions you have.

### **How long will my implant last and how should I care for my implant?**

If the implant is used under normal conditions and if you follow the detailed instructions from your doctor, the implant can last for a certain lifetime during which it functions as intended in a human body. However, all implants may need replacement at some point. Many factors could have an effect on how long your implant lasts. An implant might last longer or (considerably) shorter due to surgical and / or patient specific circumstances and characteristics.

Some factors are controlled by your doctor, such as:

- Selecting the proper implant for you
- The technique used during the surgery

You can control other factors, such as:

- Your health
- How active you are
- Lifestyle choices
- Your weight

But other factors cannot be controlled, such as:

- Your physical characteristics
- Any disease you might already have as well as its stage
- The condition of your bone
- The condition of muscles and / or tissue
- Infections
- Further surgeries

These factors can also change as you get older.

### **What should I do if I have a problem?**

If you experience any unusual or increasing pain, redness, reduced motion, or swelling in the implant, please contact your surgeon. Please report any serious incidents related to the device by informing the TGA sponsor (Zimmer Biomet) and TGA (Therapeutic Goods Administration). Please see below for the TGA sponsor and TGA contact details.
