

Clotalyst®

Autologous Activation Solution

The Next Generation in Autologous Therapy

Based on user feedback, the next generation of the Clotalyst® Autologous Activation Solution device has been completely re-designed.

The new design has eliminated the need to heat and centrifuge, resulting in a more consistent, user-friendly device that cuts the processing time in half while producing up to 40% more of the same high quality of autologous output.

BIOMET®

What is the difference?

Feature	Current Clotalyst® Solution	New Clotalyst® Solution
Processing Time	30 minutes	15 minutes
Number of Processing Steps	Three steps	Two steps
