You’ve concentrated on the procedure. Let it concentrate on the closing.

Intelligent System
Introducing an innovative way to operate. The iQ Intelligent System.

**Unprecedented Speed**
The iQ inserts screws in less than a fraction of a second. It’s the fastest insertion method available to neurosurgeons today.

**Automated Ease**
A slight downward force and the push of a button is all it takes to insert screws with precision and optimal torque every time.

**Intelligent Assistance**
The iQ’s internal software carefully monitors torque and controls the motor to ensure consistent screw insertion and prevent screw stripping.*

Experience faster, more precise screw insertion with the iQ Intelligent System.

- When compared to manual screw insertion, the iQ provided time savings triple that of battery-powered drivers.
- Screw insertion using the iQ is 40% faster than traditional battery-powered screwdrivers.
- Screw insertion using the iQ may reduce time and cost by contributing to a faster closure.

To learn more about the iQ Intelligent System, contact your Biomet representative or call 1.800.874.7711.
