Contoured Orbital Mesh

A pre-contoured solution for orbital floor reconstruction

As part of our comprehensive portfolio of orbital reconstructive products, contoured orbital mesh provides surgeons with a simple, efficient way to address fractures and defects of the orbital floor.

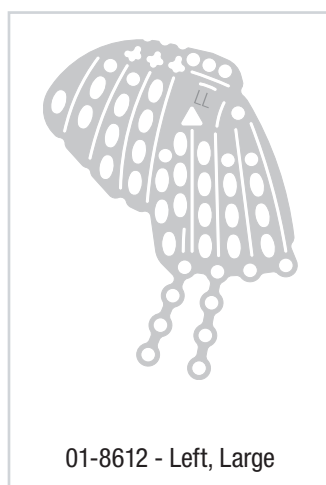

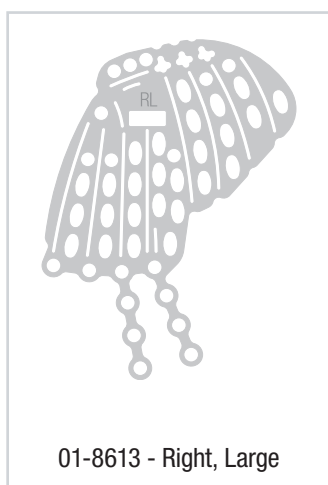

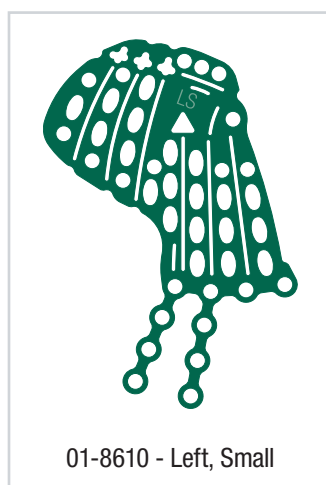

Features

- Implant is designed to fit the anatomic shape of the orbital floor, minimizing the need for bending and cutting
- Cut guides allow for easy modification and minimal sharp edges
- Compatible with 1.5mm screws in both our TraumaOne™ and CMF Midface Systems
