Versatile

- Streamlined, dedicated implant and instrumentation storage

Comprehensive

- One set contains all implants and instrumentation

Streamlined

- Dedicated plate and screw implant containers

Customizable

- Extra container pockets and specialized areas for customization

TraumaOne™: The streamlined, all-in-one plating system.
What fascinates you about the body is also what drives us. That’s why we’re always pushing the boundaries of engineering to make products that help you keep the human form as glorious as it was intended. To learn more about our breadth of products, call 800-874-7711 or visit us online at biometmicrofixation.com. We’d love to join you in a conversation about the future.

As the manufacturer of this device, Biomet Microfixation does not practice medicine and does not recommend this product for use on a specific patient. The surgeon who performs any implant procedure must determine the appropriate device and surgical procedure for each individual patient. Information contained in this brochure is intended for surgeon or distributor information only and is not intended for patient distribution. All surgeries carry risks. For additional information, and information on these risks and warnings, please see the appropriate package insert or visit our web site at www.biometmicrofixation.com or call 1-800-874-7711.

TraumaOne™ is a trademark of Biomet.

Fernandes Orbital Retractor (SP-2243)
The working end provides anatomical landmark positions and is easily adjusted to accommodate different orbital courses. The versatile retractor provides improved retraction of the orbital fat in comparison to a malleable retractor.

Full Guard (SP-2244)
A guard aids in the protection of the vascular pedicle while the cutting guide provides saw control. The instrument provides for enhanced accuracy when performing osteotomies for free fibula reconstruction.
