

**Gel-One®**

Cross-Linked Hyaluronate

# ONE INJECTION PURE<sup>1</sup> RESULTS

**ZIMMER BIOMET**  
Your progress. Our promise.®

## Single-injection Convenience

Gel-One Hyaluronate requires just one office visit for a complete, simplified single-injection treatment.

## Lower Treatment Volume

Unlike other viscosupplement treatments, in many study patients, highly purified<sup>1</sup> Gel-One Hyaluronate requires only 3mL for safe, effective and complete treatment.<sup>2</sup>

# Gel-One Cross-Linked Hyaluronate Single injection simplicity.

## No reported Pseudosepsis

Pseudosepsis, or severe acute inflammatory response, is a rare but serious concern with some viscosupplement treatments. Gel-One Hyaluronate had no reported incidences of pseudosepsis in the premarket clinical study.<sup>2</sup>

## **Preserving Quality of Life**

Gel-One<sup>®</sup> Cross-linked Hyaluronate is an early-intervention treatment designed to help patients who suffer from pain due to osteoarthritis of the knee regain their active lifestyles. Gel-One Hyaluronate is a supplement to synovial fluid, that may provide pain relief and improved knee function.<sup>2</sup>

## Reference

1. Lot release testing for protein bacterial endotoxin, and DNA (viscosity decline) performed by Seikagaku Corporation.
2. V.Strand *et al.* A multicenter, randomized controlled trial comparing a single intra-articular injection of Gel-One, a new cross-linked formulation of hyaluronic acid, to phosphate buffered saline for treatment of osteoarthritis of the knee. *Osteoarthritis and Cartilage* 2012;20: 350-356.

## Indications For Use:

Gel-One Hyaluronate is indicated for the treatment of pain in osteoarthritis (OA) of the knee in patients who have failed to respond adequately to non-pharmacologic therapy, nonsteroidal anti-inflammatory drugs (NSAIDs) or simple analgesics, e.g., acetaminophen.

## Important Safety Information

Before using Gel-One Hyaluronate, ask your patients if they are allergic to hyaluronan products, cinnamon, or products from birds such as feathers, eggs, and poultry. Gel-One Hyaluronate is only for injection into the knee, performed by a doctor or other qualified health care professional. Gel-One Hyaluronate injection should not be used in the presence of skin disease or infection around the area where the injection will be given. Gel-One Hyaluronate has not been tested to show pain relief in joints other than the knee or for conditions other than OA. Gel-One Hyaluronate has not been tested in patients who are pregnant, mothers who are nursing, or anyone under the age of 21. Strenuous or pro-longed weight-

bearing activities after treatment are not recommended. The effectiveness of repeat treatment cycles of Gel-One Hyaluronate has not been established. The side effects most commonly seen after injection of Gel-One Hyaluronate in the clinical trial were knee pain, swelling, and/or knee effusion. These reactions are generally mild and do not last long. For complete instructions for use, see the package insert and visit [www.zimmerbiomet.com](http://www.zimmerbiomet.com). Gel-One Hyaluronate is indicated for the treatment of pain in osteoarthritis (OA) of the knee in patients who have failed to respond adequately to non-pharmacologic therapy, non-steroidal anti-inflammatory drugs (NSAIDs) or simple analgesics, e.g., acetaminophen.
