It’s small. It’s strong. And it’s all suture…

JuggerKnot Soft Anchor Short facilitates small bone and joint indications!

**Suture Configuration**
- Loaded with #1 MaxBraid Suture—leaves a lower knot profile vs. a #2 suture

**Minimal Size**
- Small drill guide is less invasive to surrounding tissue than existing JuggerKnot Soft Anchor
- Small anchor diameter allows multiple anchors to be placed
- Reduces likelihood of drilling into other anchors when placing multiple anchors

**Soft Material**
- Soft anchor deployment system—completely suture based implant
- Implant made from #5 polyester suture
- Eliminates the possibility of rigid material loose bodies in the joint

**Needles**
- Tapered #5 needles can be used to tie down ligaments

The JuggerKnot Soft Anchor represents the next generation of suture anchor technology. The 1.4mm deployable anchor design is completely suture-based, and is the first of its kind.

With over 500,000 anchors sold, the award winning JuggerKnot Soft Anchor instrumentation is now designed specifically for small bone and joint procedures. The new configuration includes #5 tapered needles, a shorter drill depth, and a modified guide to simplify insertion.

JuggerKnot Soft Anchor drill guide has been specifically designed for small bone and joint procedures.
Foot and Ankle Indications
- Medial / lateral repair and reconstruction
- Mid- and forefoot repair
- Hallux valgus reconstruction
- Metatarsal ligament/tendon repair or reconstruction
- Achilles Tendon Repair

Studies by Alan Barber, M.D., et al., have shown the 1.4mm JuggerKnot Soft Anchor to have high load to failure in cortical bone as compared to other 3mm anchors.¹ ²

It’s small. It’s strong. And it’s all suture.

Hand and Wrist Indications
- Collateral ligament repair
- Scapholunate ligament reconstruction
- Tendon transfers in phalanx
- Volar plate reconstruction
