

Braces & Supports Family

Simplifying Orthopaedic Care

Zimmer Biomet Knows Orthopaedic Care

Zimmer Biomet was built on orthopaedic care. In 1927, Justin O. Zimmer started Zimmer Manufacturing Company with a line of aluminum splints. Since then, Zimmer Biomet has been providing a comprehensive assortment of braces and supports for the orthopaedic field.

A Simplified Approach to Orthopaedic Care

Today's healthcare environment is complex. One way to minimize the complexity is by reducing your number of vendors.

Fortunately, Zimmer Biomet's belief in complete patient care extends to a comprehensive assortment of braces and supports.

When you add Zimmer Biomet's Braces and Supports portfolio, you reduce the complexity of your vendor landscape.

External Fracture Management

Our Fracture Management products protect, stabilize, support, and correct injuries or abnormalities. These products include:

- **Arm, Hand/Finger, and Leg Splints** provide support for acute fractures or sprains
- **Cast Shoes** promote normal gait and protect the cast from dirt and debris

Patient Supports

Zimmer Biomet Patient Supports are designed to help aid recovery from injuries or surgeries. Our Patient Supports include:

- **Heel and Elbow Protectors** help reduce pressure to protect heels and elbows against pressure sores
- **Abduction Pillows** maintain hips in abduction following surgery
- **Positioners** align patient's bodies and protect against pressure sores
- **Cold Therapy** is a combination of cold and compression that quickly constricts blood vessels to control pain and swelling
- **Elastic Bandages** reduce swelling and relieve pain associated with sprains and strains

Orthopaedic Supports

Zimmer Biomet Orthopaedic Supports are indicated for a variety of injuries. Our orthopaedic supports include:

- **Abdominal, Arm, Back, Wrist, and Clavicle Supports** reduce aches and pains in these areas
- **Collars** reduce neck pain or neck injuries
- **Post-Op Shoes** ease pain after surgery
- **Rib Belts** provide stabilizing support for injured ribs
- **Shoulder Immobilizers** provide patient comfort while immobilizing the arm and shoulder
- **Tennis Elbow Supports** reduce elbow pain

Knee Immobilizers

Knee immobilizers are designed to prevent knees from bending for a short period of time either before or after knee surgery. Universal and sized supports are available to fit any patient. Our knee immobilizers are made of breathable perforated foam which allows for increased air circulation for added patient comfort. Additional benefits include:

- Lightweight construction
- Radiolucent aluminum stays
- Available with contoured or straight posterior stays

Fixed Hinge Lower Leg Walker

Indicated for soft tissue injuries, stable fractures, rehabilitation and other conditions. The walker frame conforms to the patient's anatomy through the contoured strut design, ensuring a better fit.
