

Instructional Course

With our mission to deliver value to healthcare providers, hospitals and patients, we aim to promote the safe and effective use of our products and services and to help each surgeon to reach the next level, by addressing the needs you encounter in your daily practice.

Zimmer Biomet Institute Instructional Courses are a vital part of Zimmer Biomet’s broad educational concept and serve to present very specific operative techniques and associated products to groups of surgeons. The overall aim is to ensure that surgeons around the world receive high quality training on the safe and effective use of our products and techniques. As a course participant, you will be involved in workshops and you will have the opportunity to interact with faculty and other delegates and to learn from the experience of each other. The main goal of this course is to help build confidence in the surgical techniques described that will benefit you and your patients alike.

The specific course objectives include:

- Review the indications for Oxford Partial Knee Arthroplasty
- Discuss the Biomechanics for Oxford PKA procedures
- Evaluate Prevention & Treatment options
- Perform Oxford PKA procedures safely and effectively during sawbone workshops
- Review the surgical tips from expert faculty that will be beneficial during your daily practice

The Zimmer Biomet Institute wishes you a valuable and enjoyable training with us.

Zimmer Biomet Institute

LEARN. INTERACT. UNDERSTAND. SHARE.

Our continuum of education offers a vast range of opportunities to health care providers and Zimmer Biomet team members to **learn, interact, understand** and **share** knowledge about our products, services and about surgical philosophies through a variety of modalities.
